SmartPark USC - Storyboard & App Layout

Storyboard Scenarios
This storyboard illustrates the user journey through the SmartPark USC app, a solution designed to help students and faculty find parking on the University of South Carolina campus.

Scenario 1: Opening the app - Main Page with "Find Parking" and "Info" buttons.
Scenario 2: Viewing available lots - Parking Lots Page displaying availability (Open, Full, 60% Full).
Scenario 3: Selecting a specific lot - Lot Details screen with a map, status, and estimated wait time.
Scenario 4: Notifications - Real-time alert when a preferred lot becomes available.

The design is inspired by familiar interfaces such as Google Maps' live parking information layout.

Logo	< Parking Lots	< Lot A	< Notifications
Find Parking	Full — Ful / 60% full — Fol / Full — Fol / Open — OK	University of South Carolina — Map of Lot — Full — Estimated wait 25 min	Lot A has 10 open spots available!
Info			∘ ∘ ∘

Main screen to begin searching for parking — List of lots with current availability — Detailed view of a selected lot — Real-time notification or alert

Design inspired by Google Maps' live parking info interface
